Election/Restrictions

Applicant's election with traverse of Species 1 in the reply filed on 05/03/06 is acknowledged. The traversal is on the grounds that (a) the claims have been amended to claim a unique applicator with particular dimensions, (b) the use of a syringe and the self powered coating supply tube are just enhancements and (c) since the foam applicator is found to be patentable, whether it is linear or in the form of a ring does not matter. Such arguments are found to be persuasive and therefore, the restriction/election requirement, as set forth in the Office action mailed on 04/25/2006, is hereby withdrawn and claims 1, 3, 4, 6, 7, 9 and 11-15 have been fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim(s) including all the limitations of an allowable claim is presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: none of the cited prior art, alone or in combination, a coating applicator having, in conjunction with other limitations, the V shaped notch with particular dimensions necessary to coat a fastener in one pass.
